

Smart Schools Investment Plan - LPCSDSSIP1

SSIP Overview

Page Last Modified: 11/02/2016

1. Please enter the name of the person to contact regarding this submission.

Dr. Roger Catania

- 1a. Please enter their phone number for follow up questions.

518 523-2475

- 1b. Please enter their e-mail address for follow up contact.

rcatania@lpcsd.org

2. Please indicate below whether this is the first submission, a new or supplemental submission or an amended submission of a Smart Schools Investment Plan.

First submission

3. All New York State public school districts are required to complete and submit a District Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations. Districts that include investments in high-speed broadband or wireless connectivity and/or learning technology equipment or facilities as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you certify that the school district has an approved District Instructional Technology Plan survey on file with the New York State Education Department.

District Educational Technology Plan Submitted to SED and Approved

4. Pursuant to the requirements of the Smart Schools Bond Act, the planning process must include consultation with parents, teachers, students, community members, other stakeholders and any nonpublic schools located in the district.

By checking the boxes below, you are certifying that you have engaged with those required stakeholders. Each box must be checked prior to submitting your Smart Schools Investment Plan.

- Parents
 Teachers
 Students
 Community members

- 4a. If your district contains non-public schools, have you provided a timely opportunity for consultation with these stakeholders?

- Yes
 No
 N/A

5. Certify that the following required steps have taken place by checking the boxes below: Each box must be checked prior to submitting your Smart Schools Investment Plan.

- The district developed and the school board approved a preliminary Smart Schools Investment Plan.
 The preliminary plan was posted on the district website for at least 30 days. The district included an address to which any written comments on the plan should be sent.
 The school board conducted a hearing that enabled stakeholders to respond to the preliminary plan. This hearing may have occurred as part of a normal Board meeting, but adequate notice of the event must have been provided through local media and the district website for at least two weeks prior to the meeting.
 The district prepared a final plan for school board approval and such plan has been approved by the school board.
 The final proposed plan that has been submitted has been posted on the district's website.

Smart Schools Investment Plan - LPCSDSSIP1

SSIP Overview

Page Last Modified: 11/02/2016

- 5a. Please upload the proposed Smart Schools Investment Plan (SSIP) that was posted on the district's website, along with any supporting materials. Note that this should be different than your recently submitted Educational Technology Survey. The Final SSIP, as approved by the School Board, should also be posted on the website and remain there during the course of the projects contained therein.

PrelimSSIP.pdf

- 5b. Enter the webpage address where the final Smart Schools Investment Plan is posted. The Plan should remain posted for the life of the included projects.

www.lpcsd.org

6. Please enter an estimate of the total number of students and staff that will benefit from this Smart Schools Investment Plan based on the cumulative projects submitted to date.

667

7. An LEA/School District may partner with one or more other LEA/School Districts to form a consortium to pool Smart Schools Bond Act funds for a project that meets all other Smart School Bond Act requirements. Each school district participating in the consortium will need to file an approved Smart Schools Investment Plan for the project and submit a signed Memorandum of Understanding that sets forth the details of the consortium including the roles of each respective district.

The district plans to participate in a consortium to partner with other school district(s) to implement a Smart Schools project.

8. Please enter the name and 6-digit SED Code for each LEA/School District participating in the Consortium.

Partner LEA/District	SED BEDS Code
(No Response)	(No Response)

9. Please upload a signed Memorandum of Understanding with all of the participating Consortium partners.

(No Response)

10. Your district's Smart Schools Bond Act Allocation is:

\$247,641

11. Enter the budget sub-allocations by category that you are submitting for approval at this time. If you are not budgeting SSBA funds for a category, please enter 0 (zero.) If the value entered is \$0, you will not be required to complete that survey question.

	Sub-Allocations
School Connectivity	0
Connectivity Projects for Communities	0
Classroom Technology	155,178
Pre-Kindergarten Classrooms	0
Replace Transportable Classrooms	0
High-Tech Security Features	92,463
Totals:	247,641

Smart Schools Investment Plan - LPCSDSSIP1

School Connectivity

Page Last Modified: 11/02/2016

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that:
 - sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or
 - is a planned use of a portion of Smart Schools Bond Act funds, or
 - is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

(No Response)

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)	(No Response)

3. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in school buildings.

(No Response)

4. Describe the linkage between the district's District Instructional Technology Plan and the proposed projects. (There should be a link between your response to this question and your response to Question 1 in Part E. Curriculum and Instruction "What are the district's plans to use digital connectivity and technology to improve teaching and learning?")

(No Response)

Smart Schools Investment Plan - LPCSDSSIP1

School Connectivity

Page Last Modified: 11/02/2016

- 5. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

(No Response)

- 6. As indicated on Page 5 of the guidance, the Office of Facilities Planning will have to conduct a preliminary review of all capital projects, including connectivity projects. Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

- 7. Certain high-tech security and connectivity infrastructure projects may be eligible for an expedited review process as determined by the Office of Facilities Planning.

Was your project deemed eligible for streamlined review?

(No Response)

- 8. Include the name and license number of the architect or engineer of record.

Name	License Number
(No Response)	(No Response)

- 9. If you are submitting an allocation for School Connectivity complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Network/Access Costs	(No Response)
Outside Plant Costs	(No Response)
School Internal Connections and Components	(No Response)
Professional Services	(No Response)
Testing	(No Response)
Other Upfront Costs	(No Response)
Other Costs	(No Response)
Totals:	0

Community Connectivity (Broadband and Wireless)

Page Last Modified: 10/25/2016

1. Describe how you intend to use Smart Schools Bond Act funds for high-speed broadband and/or wireless connectivity projects in the community.

(No Response)

2. Please describe how the proposed project(s) will promote student achievement and increase student and/or staff access to the Internet in a manner that enhances student learning and/or instruction outside of the school day and/or school building.

(No Response)

3. Community connectivity projects must comply with all the necessary local building codes and regulations (building and related permits are not required prior to plan submission).

I certify that we will comply with all the necessary local building codes and regulations.

4. Please describe the physical location of the proposed investment.

(No Response)

5. Please provide the initial list of partners participating in the Community Connectivity Broadband Project, along with their Federal Tax Identification (Employer Identification) number.

Project Partners	Federal ID #
(No Response)	(No Response)

6. If you are submitting an allocation for Community Connectivity, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Network/Access Costs	(No Response)
Outside Plant Costs	(No Response)
Tower Costs	(No Response)
Customer Premises Equipment	(No Response)
Professional Services	(No Response)

Classroom Learning Technology

Page Last Modified: 11/02/2016

1. In order for students and faculty to receive the maximum benefit from the technology made available under the Smart Schools Bond Act, their school buildings must possess sufficient connectivity infrastructure to ensure that devices can be used during the school day. Smart Schools Investment Plans must demonstrate that sufficient infrastructure that meets the Federal Communications Commission’s 100 Mbps per 1,000 students standard currently exists in the buildings where new devices will be deployed, or is a planned use of a portion of Smart Schools Bond Act funds, or is under development through another funding source.

Smart Schools Bond Act funds used for technology infrastructure or classroom technology investments must increase the number of school buildings that meet or exceed the minimum speed standard of 100 Mbps per 1,000 students and staff within 12 months. This standard may be met on either a contracted 24/7 firm service or a "burstable" capability. If the standard is met under the burstable criteria, it must be:

1. Specifically codified in a service contract with a provider, and
2. Guaranteed to be available to all students and devices as needed, particularly during periods of high demand, such as computer-based testing (CBT) periods.

Please describe how your district already meets or is planning to meet this standard within 12 months of plan submission.

The Lake Placid Central School District has a student population of 667 students. Our internet service provider is the Northeastern Regional Information Center (NERIC). Our current contracted internet speed of 70 Mbps for the number of students we host meets the minimum speed standard.

- 1a. If a district believes that it will be impossible to meet this standard within 12 months, it may apply for a waiver of this requirement, as described on the Smart Schools website. The waiver must be filed and approved by SED prior to submitting this survey.

By checking this box, you are certifying that the school district has an approved waiver of this requirement on file with the New York State Education Department.

2. Connectivity Speed Calculator (Required)

	Number of Students	Multiply by 100 Kbps	Divide by 1000 to Convert to Required Speed in Mb	Current Speed in Mb	Expected Speed to be Attained Within 12 Months	Expected Date When Required Speed Will be Met
Calculated Speed	667	66,700	66.7	70	(No Response)	(No Response)

3. If the district wishes to have students and staff access the Internet from wireless devices within the school building, or in close proximity to it, it must first ensure that it has a robust Wi-Fi network in place that has sufficient bandwidth to meet user demand.

Please describe how you have quantified this demand and how you plan to meet this demand.

The Lake Placid Central School District Local Area Network within and between school buildings is 1Gb. Our Cisco network and switches have been replaced within the past 3 years. The District has installed a Cisco WiFi network providing hotspots throughout the elementary and middle/high school buildings. The addition of approximately 275 new wireless devices will not create a burden on the system.

Smart Schools Investment Plan - LPCSDSSIP1

Classroom Learning Technology

Page Last Modified: 11/02/2016

4. **All New York State public school districts are required to complete and submit an Instructional Technology Plan survey to the New York State Education Department in compliance with Section 753 of the Education Law and per Part 100.12 of the Commissioner's Regulations.**

Districts that include educational technology purchases as part of their Smart Schools Investment Plan must have a submitted and approved Instructional Technology Plan survey on file with the New York State Education Department.

By checking this box, you are certifying that the school district has an approved Instructional Technology Plan survey on file with the New York State Education Department.

5. **Describe the devices you intend to purchase and their compatibility with existing or planned platforms or systems. Specifically address the adequacy of each facility's electrical, HVAC and other infrastructure necessary to install and support the operation of the planned technology.**

The Lake Placid Central School District will purchase a variety of mobile computing devices including ipads, laptops and chromebooks. The district has the current infrastructure to support these devices. Smartboards and projectors will also be added. The building head custodians have indicated that those devices can be supported with our current electrical infrastructure.

Smart Schools Investment Plan - LPCSDSSIP1

Classroom Learning Technology

Page Last Modified: 11/02/2016

6. Describe how the proposed technology purchases will:
- > enhance differentiated instruction;
 - > expand student learning inside and outside the classroom;
 - > benefit students with disabilities and English language learners; and
 - > contribute to the reduction of other learning gaps that have been identified within the district.

The expectation is that districts will place a priority on addressing the needs of students who struggle to succeed in a rigorous curriculum. Responses in this section should specifically address this concern and align with the district's Instructional Technology Plan (in particular Question 2 of E. Curriculum and Instruction: "Does the district's instructional technology plan address the needs of students with disabilities to ensure equitable access to instruction, materials and assessments?" and Question 3 of the same section: "Does the district's instructional technology plan address the provision of assistive technology specifically for students with disabilities to ensure access to and participation in the general curriculum?")

The Lake Placid Central School District is committed to address the needs of students who struggle to succeed in a rigorous curriculum. The district continues to provide equitable access to instruction, materials and assessments using technology to all students. Our proposed purchases with Smart School Bond Act funding will place additional mobile computing (ipads and laptops) in the hands of all students.

The benefits of mobile computing to all students are diverse and numerous. Mobile computing enhances differentiated instruction in a classroom setting. A mobile platform allows students to find sources appropriate for their levels of reading and understanding. Products created using mobile platforms are more equitable and of higher quality. Mobile computing increases collaboration among students. For example, instead of writing a summary of a topic, students could write a "chapter" in an e-book to be used by the rest of the class. A loan program allowing students to sign out ipads and laptops expands learning outside of the classroom. Research has indicated that mobile computing increases both student motivation, a personalization of learning and increased engagement. Increased engagement in learning results in an increase of quality and quantity of work (Swan, et al, 2005). Mobile computing provides a multi-modal integration of text, images and videos similar to other platforms familiar to many students. At Lake Placid Central School we have been expanding our use of mobile computing. At the elementary school we piloted a project that put one-to one ipads in the hands of all third grade students for the year. When asked to discuss the benefits of the ipads, one teacher responded:

"The iPads have been a game changer in my classroom. With the one-to-one iPads, the students literally take the learning into their own hands. They are immediately engaged and instruction is differentiated for each student. When used as an assessment tool, I am able to get immediate feedback from all students; even the reluctant students participate. Hesitant readers cannot wait to read books online- their classmates cannot judge what they are reading based on the cover of the book! We have apps installed for our Tier 2 readers which help with their fluency and comprehension. I have one student who is a very weak writer- sentence structure, spelling and grammar are all weak. When he types on a laptop- he immediately checks, edits and revises. He is able to see his errors much more easily than on paper."

Lake Placid Elementary Third Grade Teacher Patricia Damp

At the middle/high school level we have expanded our mobile computing beyond rolling carts of laptops to dedicated carts in grade levels and subject areas. Smart School Bond Act funding will allow us to move further toward a one-to-one model at the middle/high school level.

At Lake Placid Central School we see the benefit of providing a personal, mobile, connected learning environment to all students. The benefits of mobile computing apply to all of our students, those who struggle and those who do not. Technology is a tool that we use to open access to learning for all students.

Smart Schools Investment Plan - LPCSDSSIP1

Classroom Learning Technology

Page Last Modified: 11/02/2016

7. **Where appropriate, describe how the proposed technology purchases will enhance ongoing communication with parents and other stakeholders and help the district facilitate technology-based regional partnerships, including distance learning and other efforts.**

The proposed technology purchases within the Smart Schools Bond Act funding will enhance education by placing technology in the hands of students. The Lake Placid Central School District will expand its commitment to increase ongoing communication with parents and community members about the new educational opportunities provided by the new technology. At both the elementary and middle/high school levels the current parental newsletters will feature articles on new technologies and specific projects in the district. The district has also created a partnership between the school district and the Lake Placid News, the local newspaper. The newspaper will feature a column written by a Lake Placid Central School teacher, administrator, staff member or student highlighting a program or project within the district each week. The column in the local paper will increase communication with parents and community members about the programs Smart Schools Bond Act funding allows our students.

Lake Placid Central School District views Smart Schools Bond Act funding proposed technology purchases as a vehicle to increase collaborative student projects with an additional presentation component that would see family and community members as the targeted audience. Student projects utilizing online technology would ultimately open the schoolhouse doors to the community so that our community members could more easily collaborate with student activities as participants and audience members.

Using Smart Schools Bond Act funding proposed technology purchases of a variety of mobile computing devices will facilitate a renewed regional partnership with the three (3) non-public schools in the district. Two of the three non-public schools matriculate students to the public school in 4th and 9th grades. With the technology loan program and a commitment to discuss and create a shared vision of skills and student opportunities, we hope to coordinate efforts with our non-publics to use mobile computing to its highest educational advantage. As will be discussed in question #8 to follow, the district will also enhance our partnership with our non-public schools through invitation to select presentations to students and staff. Technology will also be in place to live-stream and archive staff development opportunities for access to our non-public partners. One goal of our increased collaboration with the non-public schools within our district is to develop a group of educators willing to communicate topics and skills through skype interactions with students in different schools. These "ask an expert" opportunities will range from a virtual tour of one of the non-public schools that has a working farm onsite to the robotics classes from different schools skyping to compare classroom learning. The Lake Placid Central School District is committed to foster our regional partnership with the three non-public schools in our district.

An additional private secondary school in Lake Placid, the National Sports Academy, permanently closed its doors on May 31, 2015.

Classroom Learning Technology

Page Last Modified: 11/02/2016

- 8. Describe the district's plan to provide professional development to ensure that administrators, teachers and staff can employ the technology purchased to enhance instruction successfully.

Note: This response should be aligned and expanded upon in accordance with your district's response to Question 1 of F. Professional Development of your Instructional Technology Plan: "Please provide a summary of professional development offered to teachers and staff, for the time period covered by this plan, to support technology to enhance teaching and learning. Please include topics, audience and method of delivery within your summary."

Technology professional development is offered to Teachers and Teaching Assistants through multiple paths that focus on instructional application of technology, student engagement, professional learning communities, and new technologies.

The district will also enhance our staff-development partnership with our non-public schools through invitation to select presentations to students and staff. Technology will also be in place to live-stream and archive staff development opportunities for access to our non-public partners.

Superintendent's Conference Days: Through a series of four full-days and two half-days teachers have the opportunity to attend a variety of guest facilitator and teacher-taught workshops on relevant technologies. The charts below outlines the preliminary look at the 2016-17 offerings. Final determination of offerings will be conducted by the District Staff Development Committee, a representative group of board members, administrators, teachers and teaching assistants.

Professional Development	Topics	Audience	Delivery Method
Superintendent's Conference Days 09/01/16, 09/02/16 10/21/16 02/17/17 03/24/17	Sample topics to include: Strategic Goals Google School Making Learning Visible iPad apps for classroom management Twitter in the classroom Advanced Google Tools iPads for Elem iPads in the 1 to 1 classroom	Teachers and Teaching Assistants	Teacher-led workshops and hands on opportunities with technology

Public/Non-Public School Professional Learning Community will be created for those educators interested in digital sharing of information and video content to enhance instruction.

Professional Development	Topics	Audience	Delivery Method
Public/ Non-Public Professional Learning Community	Digital information sharing, video content opportunities, new technology tools	Teachers and Administrators	Workshop, discussion, group work, hands on activities, skype sessions

- 9. Districts must contact the SUNY/CUNY teacher preparation program that supplies the largest number of the district's new teachers to request advice on innovative uses and best practices at the intersection of pedagogy and educational technology.

By checking this box, you certify that you have contacted the SUNY/CUNY teacher preparation program that supplies the largest number of your new teachers to request advice on these issues.

- 9a. Please enter the name of the SUNY or CUNY Institution that you contacted.

SUNY Potsdam

Classroom Learning Technology

Page Last Modified: 11/02/2016

9b. Enter the primary Institution phone number.

(315) 267-2000

9c. Enter the name of the contact person with whom you consulted and/or will be collaborating with on innovative uses of technology and best practices.

Dr. Anthony K. Betrus

10. A district whose Smart Schools Investment Plan proposes the purchase of technology devices and other hardware must account for nonpublic schools in the district.

Are there nonpublic schools within your school district?

- Yes
- No

10a. Describe your plan to loan purchased hardware to nonpublic schools within your district. The plan should use your district's nonpublic per-student loan amount calculated below, within the framework of the guidance. Please enter the date by which nonpublic schools must request classroom technology items. Also, specify in your response the devices that the nonpublic schools have requested, as well as in the in the Budget and the Expenditure Table at the end of the page.

The Lake Placid Central School District will loan hardware on an equitable basis to non-public schools in the district upon request. The non-public student loan amount calculates to the equivalent of \$155.00 per pupil. Non-public schools may request to borrow hardware purchased with Smart Schools Bond Act funding by sending a request to the District Clerk by June 1st for the following academic year. Equipment loans and support will be coordinated by the Superintendent's designee. Typically loans will be made for a period of ten (10) weeks. During the initial year the District may adjust the June 1st deadline for hardware loans.
During our consultations with the non-public schools in our district they identified that they would be most receptive to borrowing mobile labs of iPad mini tablets.

10b. A final Smart Schools Investment Plan cannot be approved until school authorities have adopted regulations specifying the date by which requests from nonpublic schools for the purchase and loan of Smart Schools Bond Act classroom technology must be received by the district.

By checking this box, you certify that you have such a plan and associated regulations in place that have been made public.

11. Nonpublic Classroom Technology Loan Calculator

The Smart Schools Bond Act provides that any Classroom Learning Technology purchases made using Smart Schools funds shall be lent, upon request, to nonpublic schools in the district. However, no school district shall be required to loan technology in amounts greater than the total obtained and spent on technology pursuant to the Smart Schools Bond Act and the value of such loan may not exceed the total of \$250 multiplied by the nonpublic school enrollment in the base year at the time of enactment.

See:

	1. Classroom Technology Sub-allocation	2. Public Enrollment (2014-15)	3. Nonpublic Enrollment (2014-15)	4. Sum of Public and Nonpublic Enrollment	5. Total Per Pupil Sub-allocation	6. Total Nonpublic Loan Amount
Calculated Nonpublic Loan Amount	155,178	667	299	966	160	47,840

Smart Schools Investment Plan - LPCSDSSIP1

Classroom Learning Technology

Page Last Modified: 11/02/2016

12. To ensure the sustainability of technology purchases made with Smart Schools funds, districts must demonstrate a long-term plan to maintain and replace technology purchases supported by Smart Schools Bond Act funds. This sustainability plan shall demonstrate a district's capacity to support recurring costs of use that are ineligible for Smart Schools Bond Act funding such as device maintenance, technical support, Internet and wireless fees, maintenance of hotspots, staff professional development, building maintenance and the replacement of incidental items. Further, such a sustainability plan shall include a long-term plan for the replacement of purchased devices and equipment at the end of their useful life with other funding sources.

By checking this box, you certify that the district has a sustainability plan as described above.

13. Districts must ensure that devices purchased with Smart Schools Bond funds will be distributed, prepared for use, maintained and supported appropriately. Districts must maintain detailed device inventories in accordance with generally accepted accounting principles.

By checking this box, you certify that the district has a distribution and inventory management plan and system in place.

14. If you are submitting an allocation for Classroom Learning Technology complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Interactive Whiteboards	7,062
Computer Servers	0
Desktop Computers	36,960
Laptop Computers	72,224
Tablet Computers	35,850
Other Costs	3,082
Totals:	155,178

15. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov. Please specify in the "Item to be Purchased" field which specific expenditures and items are planned to meet the district's nonpublic loan requirement, if applicable. NOTE: Wireless Access Points that will be loaned/purchased for nonpublic schools should ONLY be included in this category, not under School Connectivity, where public school districts would list them. Add rows under each sub-category for additional items, as needed.

Pre-Kindergarten Classrooms

Page Last Modified: 10/25/2016

1. Provide information regarding how and where the district is currently serving pre-kindergarten students and justify the need for additional space with enrollment projections over 3 years.

(No Response)

2. Describe the district’s plan to construct, enhance or modernize education facilities to accommodate pre-kindergarten programs. Such plans must include:

- Specific descriptions of what the district intends to do to each space;
- An affirmation that pre-kindergarten classrooms will contain a minimum of 900 square feet per classroom;
- The number of classrooms involved;
- The approximate construction costs per classroom; and
- Confirmation that the space is district-owned or has a long-term lease that exceeds the probable useful life of the improvements.

(No Response)

3. Smart Schools Bond Act funds may only be used for capital construction costs. Describe the type and amount of additional funds that will be required to support ineligible ongoing costs (e.g. instruction, supplies) associated with any additional pre-kindergarten classrooms that the district plans to add.

(No Response)

4. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

5. If you have made an allocation for Pre-Kindergarten Classrooms, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct Pre-K Classrooms	(No Response)
Enhance/Modernize Educational Facilities	(No Response)
Other Costs	(No Response)
Totals:	0

6. Please detail the type, quantity, per unit cost and total cost of the eligible items under each sub-category. This is especially important for any expenditures listed under the "Other" category. All expenditures must be capital-bond eligible to be reimbursed through the SSBA. If you have any questions, please contact us directly through smartschools@nysed.gov. Add rows under each sub-category for additional items, as needed.

Replace Transportable Classrooms

Page Last Modified: 10/25/2016

1. Describe the district’s plan to construct, enhance or modernize education facilities to provide high-quality instructional space by replacing transportable classrooms.

(No Response)

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
(No Response)

3. For large projects that seek to blend Smart Schools Bond Act dollars with other funds, please note that Smart Schools Bond Act funds can be allocated on a pro rata basis depending on the number of new classrooms built that directly replace transportable classroom units.

If a district seeks to blend Smart Schools Bond Act dollars with other funds describe below what other funds are being used and what portion of the money will be Smart Schools Bond Act funds.

(No Response)

4. If you have made an allocation for Replace Transportable Classrooms, complete this table. Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Construct New Instructional Space	(No Response)
Enhance/Modernize Existing Instructional Space	(No Response)
Other Costs	(No Response)
Totals:	0

High-Tech Security Features

Page Last Modified: 11/02/2016

1. Describe how you intend to use Smart Schools Bond Act funds to install high-tech security features in school buildings and on school campuses.

Lake Placid Central School will use Smart Schools Bond Act funds to upgrade and expand our electronic security systems. Our current security monitoring system monitors exterior doorways to the Middle/High School and Elementary School. We will use Smart Schools Bond Act funds to upgrade all exterior security cameras. All fourteen (14) existing security cameras will be upgraded. Additionally a total of thirty-five(35) new cameras will be added to monitor interior locations in both buildings. School district administrators will have access to the security monitoring system through a secure network connection. In the event of an emergency all cameras will be accessible electronically by local law enforcement and emergency agencies.

2. All plans and specifications for the erection, repair, enlargement or remodeling of school buildings in any public school district in the State must be reviewed and approved by the Commissioner. Districts that plan capital projects using their Smart Schools Bond Act funds will undergo a Preliminary Review Process by the Office of Facilities Planning.

Please indicate on a separate row each project number given to you by the Office of Facilities Planning.

Project Number
15-11-02-04-7-999-BA1
15-11-02-04-7-999-0001

3. Was your project deemed eligible for streamlined Review?

- Yes
- No

3a. Districts with streamlined projects must certify that they have reviewed all installations with their licensed architect or engineer of record, and provide that person’s name and license number. The licensed professional must review the products and proposed method of installation prior to implementation and review the work during and after completion in order to affirm that the work was code-compliant, if requested.

By checking this box, you certify that the district has reviewed all installations with a licensed architect or engineer of record.

4. Include the name and license number of the architect or engineer of record.

Name	License Number
Mosaic Associates	25849

5. If you have made an allocation for High-Tech Security Features, complete this table.

Note that the calculated Total at the bottom of the table must equal the Total allocation for this category that you entered in the SSIP Overview overall budget.

	Sub-Allocation
Capital-Intensive Security Project (Standard Review)	0
Electronic Security System	92,463
Entry Control System	0
Approved Door Hardening Project	0
Other Costs	0
Totals:	92,463
