

Lake Placid Elementary School Newsletter

For the week of April 24, 2020

Left: An old fashion game of Battleship with a modern day twist – opponent is on line.

Right: Torin and his Papa are setting fence for the new vegetable garden. Torin used his mathematical skills to measure and use a level to help complete the project. A fun way to keep busy during these off-campus Elementary school days

Staff reads the classic story “Green Eggs and Ham.” Please enjoy by following the link below

In the House by Rhaya T.

She stayed in the house and it felt like forever.
It really wasn't.
She played outside.
She did her work.
She had fun but she missed her friends.
She liked having time with her family, she missed school though.
All because of Covid 19.

How I feel About School now by Emma C.

The way I felt about school before all of this happened, I thought that homeschool was going to be easy. It is a lot harder than I thought. The technology sometimes doesn't work and not all of my classmates join the video chat.

The way I feel About school after all of this has happened, I feel that when we are in school it a lot easier. Everyone is in class and paying attention to the teacher. That it is hard to do over the computer. Also school is fun

Reminders:

For district updates please see our website at <http://www.lpcsd.org/district/coronavirus-update/>

Please visit Mrs. Phillion's website to get project ideas and information on how to make some wonderful art at home!

~Jay/Wilmington Food Pantry
Don Morrison (518) 946-7192

Moving Forward:

Today I helped deliver meals in the snow and felt bad for leaving the paper bags knowing they would get wet and soggy. Please, we ask that you have a designated drop off area so that we may deliver your material to you safely and maintain social distancing. A cardboard box or plastic tub works great! Feel free to wave through a window but do not put yourself at risk by coming to greet us. We celebrate “air hugs” and “distant high 5’s”

ZOOM
meeting **RULES**

- 1 Mute your microphone until you want to speak.
- 2 Raise your hand when you have something to say.
- 3 Listen while other classmates are talking.
- 4 Take selfies at home... not of classmates during meetings.
- 5 Be respectful and kind.

© The iVee Kids 2020

Lake Placid Central School

Please leave a basket or box that is marked for us to leave materials. We would love to see you, but ask that you limit your interactions to waving through the window.

Leave a spot for us to drop

If there is no marked spot, we will leave materials by your door.

Lake Placid Full Day Universal Pre-K
FREE Universal Prekindergarten offered at St. Agnes School for children who turn 4 before 12-1-20

Preschool provides a foundation for learning both socially and academically that will help your child to succeed in elementary school. Come grow with us!

It is time to register for Universal Prekindergarten!
Open enrollment happening now

Bus service provided • Lunch available
Download an application at stagnesp.org/forms • Email application and questions to admin@stagnesp.org • PRIORITY DEADLINE MAY 15

Schedule
Arrival
Morning meeting
Learning activities
center time
Indoor and outdoor play
Morning snack
Math centers
Buddy lunch
Music and movement
Quiet time and talking lessons
Dismissal

Is this happening to you? Will shares how his life has changed these last few weeks. Follow the link below to see his stop-animation film.

Homemade Hand Sanitizer

Rikki, Kyrah and Rylee make their own hand sanitizer with Mrs. Tremblay

Science at home:

Homemade Ice Cream – who doesn't like ice cream?

You will need:

- 4 oz of milk
- 4 oz of cream
- 1/4 tsp of vanilla (or use other flavors usually found near the vanilla in a grocery store – you can use chocolate syrup for chocolate ice cream)
- 4 tsp of sugar
- A few drops of food coloring (optional – if you want colorful ice cream)
- Lots of ice
- Lots (half cup) of salt. Rock salt (sold at hardware stores) works best.
- Small (quart size) zip-lock freezer bag
- Large (gallon size) zip-lock freezer bag

What to do:

1. Put the milk, cream, flavoring, coloring, and sugar into the SMALL zip-bag and zip it shut (be **sure** it is zipped up and closed completely)
2. Put about a cup of ice into the large bag and the cover the ice with a small handful of salt. Put the small bag with your ingredients into the larger bag.
3. Add some more ice and then some more salt. Keep adding salt and ice until the bag is almost full.
4. Zip it shut (be sure it is zipped) and then carefully hold opposite sides of the bag and shake the bag back and forth (like your steering a car) for about 5-8 minutes.
5. Open the larger bag and take out the smaller bag – it should be full of ice cream! Rinse off the bag under running water to remove any salt that may be near the opening of the bag.
6. Open and enjoy!

The Science of Ice Cream

When you added salt to the ice, the chemistry between the two forced the ice to melt. Before the ice could melt though, it needed to borrow heat from objects that surround it. This is called an *ENDOTHERMIC* process. Since your ingredients are not as cold as the ice, it borrowed heat from your ingredients making them colder! When they get colder, they freeze up into ice cream. Yum!
